# What is Web Development?

## A Brief Introduction

Web development is the building and maintenance of websites; it's the work that happens behind the scenes to make a website look great, work fast and perform well with a seamless user experience. Web developers, or 'devs', do this by using a variety of coding languages.

# Division Of The Developer Roles

## Front -End

Involves tech that deals with only the Look and feel of the website

# Developer Tools!

#TOOL 2

# Git & Git Hub

## #TOOL3

GitHub is a Git repository hosting service, but it adds many of its own features. While Git is a command line tool, GitHub provides a Web-based graphical interface. It also provides access control and several collaboration features, such as a wikis and basic task management tools for every project.
